

**CONTENTS OF VOLUME 296**

Number 1, February 1, 2006

<b>The Lie algebra associated to a unit form</b>	<b>1</b>
M. Barot, D. Kussin, and H. Lenzing	
<b>Descent for differential modules and skew fields</b>	<b>18</b>
Mark van Hoeij and Marius van der Put	
<b>Equivariant Brauer groups and cohomology</b>	<b>56</b>
A.M. Cegarra and A.R. Garzón	
<b>The Larson–Sweedler theorem for multiplier Hopf algebras</b>	<b>75</b>
Alfons Van Daele and Shuanhong Wang	
<b>An extension of Watanabe’s theorem for the Isaacs–Horimoto–Watanabe corresponding blocks</b>	<b>96</b>
Morton E. Harris and Shigeo Koshitani	
<b>Algebra schemes and their representations</b>	<b>110</b>
Amelia Álvarez, Carlos Sancho, and Pedro Sancho	
<b>The real genus of cyclic by dihedral and dihedral by dihedral groups</b>	<b>145</b>
José Javier Etayo Gordejuela and Ernesto Martínez	
<b>Cohomology of graded Lie algebras of maximal class</b>	<b>157</b>
Alice Fialowski and Dmitri Millionschikov	
<b>Cartan invariants and central ideals of group algebras</b>	<b>177</b>
Thomas Breuer, László Héthelyi, Erzsébet Horváth, Burkhard Külshammer, and John Murray	
<b>New simple Lie superalgebras in characteristic 3</b>	<b>196</b>
Alberto Elduque	
<b>Multiple idealiser rings of injective dimension one</b>	<b>234</b>
A.W. Chatters	
<i>Corrigendum</i>	
<b>Corrigendum to “Minimum polynomials and lower bounds for eigenvalue multiplicities of prime-power order elements in representations of classical groups” [J. Algebra 243 (2001) 228–263]</b>	<b>249</b>
L. Di Martino and A.E. Zalesskii	
<b>Variations on a theorem by Alan Camina on conjugacy class sizes</b>	<b>253</b>
Antonio Beltrán and María José Felipe	
<b>Higher syzygies of ruled varieties over a curve</b>	<b>267</b>
Euisung Park	
<b>Finite differences in finite characteristic</b>	<b>285</b>
David Adam	

<b>A partial Burnside ring of <math>GL(n, q)</math> relative to line stabilizers</b>	<b>301</b>
D. Tambara	

Number 2, February 15, 2006

<b>On commutator ideals in free Lie algebras</b>	<b>323</b>
Joseph Abarbanel	
<b>Some new biautomatic Coxeter groups</b>	<b>339</b>
Patrick Bahls	
<b>Quantum groupoids and dynamical categories</b>	<b>348</b>
J. Donin and A. Mudrov	
<b>Simple fusion systems and the Solomon 2-local groups</b>	<b>385</b>
Markus Linckelmann	
<b>A note on the Schur multiplier of a fusion system</b>	<b>402</b>
Markus Linckelmann	
<b>The Solomon system <math>\mathcal{F}_{\text{Sol}}(3)</math> does not occur as fusion system of a 2-block</b>	<b>409</b>
Radha Kessar	
<b>On the representation dimension of tilted and lura algebras</b>	<b>426</b>
Ibrahim Assem, María Inés Platzeck, and Sonia Trepode	
<b>Quantum- and quasi-Plücker coordinates</b>	<b>440</b>
Aaron Lauve	
<b>Zero-divisor graphs of non-commutative rings</b>	<b>462</b>
S. Akbari and A. Mohammadian	
<b>On some representations of the Drinfel'd double</b>	<b>480</b>
S. Burciu	
<b>Cellular algebras and inverse semigroups</b>	<b>505</b>
James East	
<b>Finitary Galois extensions over noncommutative bases</b>	<b>520</b>
Imre Bálint and Kornél Szlachányi	
<b>Resolving <math>G</math>-torsors by abelian base extensions</b>	<b>561</b>
V. Chernousov, P. Gille, and Z. Reichstein	
<b>Four-dimensional Yetter–Drinfeld module algebras over <math>H_4</math></b>	<b>582</b>
Hui-Xiang Chen and Yinhua Zhang	
<b>Author index for volume 296</b>	<b>635</b>
